20L AdBlue®

Prenco Compact Spill Response Kit

AdBlue® requires a dedicated supplementary spill kit (Oil & Fuel Hydrocarbon Spill Kits are unsuitable and not recommended).

AdBlue® is the marketing term for a fluid used in the catalytic converter fitted to the exhaust systems of some diesel trucks and cars. It is injected into the exhaust gases and burnt at very high temperatures to break down harmful nitrogen oxides. Some diesel engines need AdBlue® to help them meet tough Euro 6 emissions standards that regulate what level of harmful emissions can come out of a car's exhaust.

This kit is an easy to store AdBlue® dedicated spill kit for first response to small spills or to help contain larger spills from spreading into the environment until back-up absorbents resourced from depot.

Suitable for absorbing 20L of AdBlue®, Diesel Exhaust Fluid, Aqueous Urea Solutions and Selective Catalytic Reduction.

AdBlue® spills are required to be contained, removed and remediated while maintaining compliance with EPA act/policies.

Ideal small chemical kit for Transport Vehicles & Emergency Response Groups.

Contents:

P/N	QTY	ITEM DESCRIPTION
		ABSORBENTS
2565J5GP	1	Spill Stop Mineral Absorbent - 5L Jug
25712100H	1	Hazchem Mini Boom, 1.2m x 100mm
2575040H-4	6	Hazchem Absorbent Poly Pads, 400gsm - 500 x 400mm
		CLEAN UP
25421	1	Dust Pan & Brush Set
