

## Single Use Bio-Waste Kit

Silverback's Single Use Bio-Waste Kit is unique and provides a safe and easy to use pack for the removal of spill contaminants. The main absorbent used is a natural mineral, non-toxic absorbent powder which rapidly immobilizes and deodorizes potentially infectious spills. This kit is unique in that the absorbent properties solidify spills on contact. The Bio-Waste kit leaves the affected area clean and disinfected.

These kits are ideal for use in Hospitals, Nursing Homes, Schools, Public Transport, Taxis, Doctors Surgery, Day Care Centres, Restaurants, Pubs & Clubs, Automobiles, Cruise Ships, Veterinary Clinics and Waste Management.

The leading edge LSL absorbent offers many features and benefits for cleaning up spills:

- Natural, non-toxic absorbent powder
- Rapidly immobilizes and deodorizes potentially infectious spills such as blood, vomit, faeces and urine
- Unique absorbent properties solidify spills on contact
- Safe, easy removal, minimizing the risk of personal contact
- Helps avoid cross contamination
- Encapsulates solids

For added protection our Bio-Waste kit has no sharp edges and includes all Personal Protection Equipment required to complete the job. The scoop and scraper have rounded edges to avoid puncturing of the protective gloves. This kit is designed as a single use kit only. For larger volume spills, please see our "Big Bucket" and "Response Bin" products.
