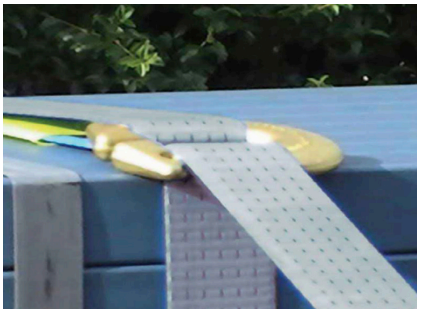
P/N: 10270

Strap Load Choker

50mm Strap LC 2500kg

SILVERBACK
SUPERIOR PROTECTION & SAFETY



TECHNICAL SPECIFICATIONS:

- Manufactured in accordance with AS4380
- Drop forged alloy steel for strength and durability
- Zinc Passivated finish for long service life
- Rolled edges to maximise service life of straps
- Huge improvement over traditional belly strap method as it creates even tension around the load
- Significantly faster unloading times, particularly with multiple deliveries
- Far greater restraint ability in emergency situations

SIZE:

- **P/N 10270:** Strap Load Choker LCC 2500kg

USE WITH:

- **P/N 10330:** 50mm x 9mt Ratchet Tiedown 2500kg

Innovative Load Control Solutions.

Silverback understands the rigors of the transportation industry whether it's local, interstate or international freight forwarders. We're always here to help and provide the best equipment for the task at hand, at the right price.

Silverback is known for its service and products - from cargo protection to spill control. Silverback is also well known in the industry for its tiedown system, G70 chains, ratchet dogs and are also the key supplier to the market for load chokers.

The unique and popular strap load chokers are engineered and designed for application with 50mm webbing straps and are manufactured to international standards.

Load chokers are the latest innovation in load restraints. The 2:1 leverage pulls the load together, restricting movement in all directions. It restrains loads that are near impossible to secure. Products of differing shapes and sizes can be quickly and effectively restrained with fewer straps, saving time and eliminating safety concerns. Top layers can be securely belly wrapped to stop the centre of load shifting forward under braking. There is no need to pyramid stack, therefore maximizing payloads. Loads on trade racks and machinery can also be secured faster and safer than conventional methods.

Lashing Capacity: 2500kg

Silverback has a large range of load restraints and other items in store, and is a recognised leader in this industry.
