Ratchet Cargo Bar Square Rubber Feet

2200mm to 2900mm, WLL 200kg

SILVERBACK
SUPERIOR PROTECTION & SAFETY

EASY AND QUICK!

Secure your cargo, load or equipment, wherever you go!

Silverback's Cargo Bar with square rubber feet provides a fast and easy way to secure cargo when there is no E or F-Track in place. The bar is adjusted to fit within the space and an easy-to-use ratchet system is used to extend or contract the length to suit.

With 95mm x 95mm non-slip rubber pads, it is perfect for fitting inside the corrugations in shipping container walls or roof, to secure loads from shifting. This bar helps to keep cargo from tipping over or moving out of place and is ideal for cargo that is stacked such as boxes, pallets, or other top-heavy cargo that is at risk of tipping over during transport.

The Cargo Bar will also work in refrigerated containers, truck trailers, vans or utes.

It's fitted with variable black rubber grip pads to each end, made from 40mm x 40mm square galvanised tube for strength and durability. The contracted length is 2200mm and it fully extends to 2900mm.

Ratcheting cargo bars are suitable for horizontal and vertical applications. Great for use in reefer and standard shipping containers where F-Track isn't available.

Packed in a bundle of 4

FEATURES:

- Heavy duty, steel tube cargo bar with ratchet
- Easy handling
- Ends with rubber feet
- Perfect to hold your cargo in position
- 140 per crate, packed in a bundle of 4
