RATCHET CARGO BAR SQUARE RUBBER FEET

2200mm to 2900mm

Silverback understands the rigors of the transportation industry whether it's local, interstate or international freight forwarders. We're always here to help and provide the best equipment for the task at hand, at the right price.

Silverback ratcheting design cargo bar makes adjustment easy and efficient. Steel bar with galvanised finish provides a suitable finish for most environments, and the soft-grip padded ratchet handle makes adjusting the length comfortable. With 100mm x 50mm non-slip rubber pads, the ratcheting cargo bar will stay in place on most surfaces and prevent your cargo from shifting.

Ratcheting cargo bars are suitable for horizontal and vertical applications. Great for use in reefer and standard shipping containers where F-Track isn't available.

Silverback has a large range of towing and car carrying items instore and are known leaders in this industry.
