

# Ratchet Replacement Strap

Silverback's load restraint equipment are designed to meet the ruggedness of the transport industry. Silverback Ratchet Replacement Straps are reliable and give peace of mind that your load is secure. All our straps are designed, manufactured and tested for compliance with AS/NZS 4380:2001 and are backed by the Silverback assurance of quality.

Ratchet replacement straps come in various lengths, with the most common being 50mm x 9m long. Each strap has a reinforced loop which holds the 2500kg rated hook and keeper. They come with 2 standard Silverback blue wear sleeves and the non-fitting end of the strap is cut and heat sealed to protect from fraying. The straps are silver in colour and have clear visible markings with rated capacity. They also have an additional 5 x black stitching on the webbing strap which indicates the 2500kg lashing capacity (see pic below).

Like all our other quality webbing products, they come with PU coating for increased UV protection and a wear pad inside the single loop for extra strength and durability.

Silverback also offers custom winch straps as well. Please check your local Silverback office about custom colours, as well as branding to suit your company. Minimum quantities and lead times apply.

Silverback has a large range of load restraints and other items instore and are recognised leaders in this industry. For the latest load restraint and safety catalogue visit us at [www.silverback.com.au](http://www.silverback.com.au).
