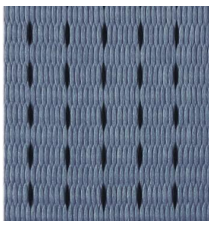
Winch Strap with J Hook

9m x 50mm, LC 2500kg, Hi-visibility Pink

SILVERBACK
SUPERIOR PROTECTION & SAFETY



QUALITY & RELIABILITY

All our straps are designed, manufactured and tested for compliance with AS/NZS 4380:2001.

Silverback's single wire J-Hook, 9m winch replacement straps are compatiable with 3-Tonne undermount truck winches and are the industry standard for restraining most types of general freight and cargo such as pallets, crates, bundles, machinery and all types of vehicles and equipment. Silverback car carrying straps with J-Hooks form the perfect system for securing a vehicle to a car transport deck over its tyres.

The popular single wire J-Hook has many useful options. Secure straps in horizontal, vertical or round trailer slots or secure straps to shipping container lashing points.

The J-Hook, 9m strap, comes supplied with 2 x wear sleeves, and for increased durability, our strap loops are reinforced to reduce wear from the end fitting contact points. Compliance tags are securely attached to the webbing.

Like all our other quality car carrying webbing products, they come with PU coating for increased UV protection and a wear pad inside the single loop for extra strength and durability.

Silverback also offers custom winch straps as well. Please check your local Silverback office about custom colours, as well as branding to suit your company. Minimum quantities and lead times apply.

IMPORTANT – Load Restraints are not to be used for lifting applications.

FEATURES:

- Fitted with two standard Silverback wear sleeves
- Hi-visibility Pink strap colour
- Loops for hardware include inner wear strips for extra strength and durability
- Straps have PU coating for increased UV protection
