

Quick Lash Single Loop Strap

Silverback's Towing equipment are designed to meet the ruggedness of the Towing, Vehicle Recovery and Car Carrying industry. Silverback quick lash single loop straps are reliable and give peace of mind that your load is secure. All our straps are designed, manufactured and tested for compliance with AS/NZS 4380:2001 and are backed by the Silverback assurance of quality.

Quick lash straps come in various lengths, with the most common being 50mm x 2.6m long. Each strap has an 85mm reinforced loop to suit the quick lash winch system on the tilt tray deck, as pictured in the photo to the left.

Like all our other quality webbing products, they come with PU coating for increased UV protection and a wear pad inside the single loop for extra strength and durability.

Silverback has a large range of towing and car carrying items instore and are recognised leaders in this industry. For the latest load restraint and safety catalogue visit us at www.silverback.com.au.
