

Wheel Straddle Strap

Silverback Wheel Straddle Straps are designed to meet the ruggedness of the Towing and Car Carrying industry. Silverback straps are reliable and give you the peace of mind that your load is secure. All our straps are designed, manufactured and tested for compliance with AS/NZS 4380:2001 and are backed by the Silverback assurance of quality.

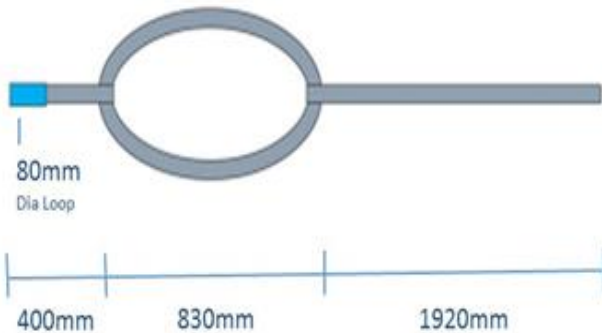

Wheel Straddle Straps are used to secure a single tyre to the deck of a truck or trailer.

We offer two types, 10691 which suits most standard small to medium size car tyres or 10691L which is suitable for large wheel diameters or wide profiles.

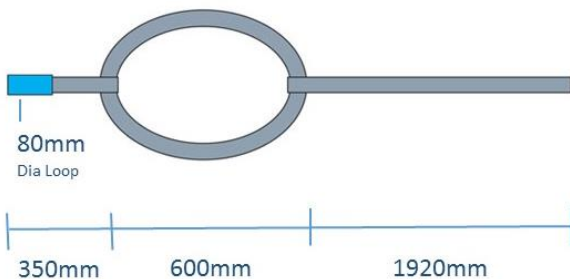

Inside of the 80mm diameter loops have an additional inner sleeve sewn in to provide additional strength and wear against use, and all our Silverback Straps are PU coated for increased UV protection.
