

# PRIMATE PALLET ANGLE PLACEMENT TOOL

## Extends up to 2.5m

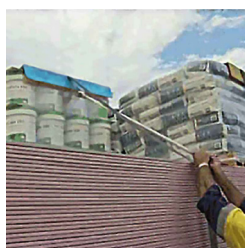

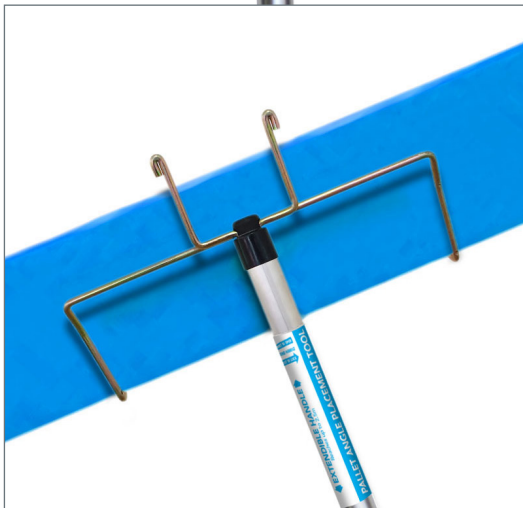

Safety is a top priority in the trucking industry. The well-being and protection of truck operators, warehouse personnel, and freight is of utmost importance to us. That's why we've developed a uniquely designed tool that makes loading trucks safer for everyone.

Our new safety tool for loading cargo makes jobs easier and safer. It stops people from needing to climb on truck trailers, which can cause accidents. The device is long and can extend, so it's easy to reach high loads from the ground. It also has a unique head for positioning straps accurately, which keeps the cargo stable during travel.

The tool is light, only 900 grams, and comfortable, so it doesn't tire you. You can make it longer or shorter, from 1.45m to 2.5m with a reach of 4m. It's robust, reliable, and works with standard pallet angles, adding extra safety for moving cargo. This tool is excellent for keeping workers safe and making loading easier.

Make the Pallet Angle Placement Tool essential to your cargo handling routine. Prioritise your safety, minimise risks, and ensure every journey is secure.

Elevate your OH&S standards and experience the peace of mind that comes with an angle assist tool designed to protect both truckers and cargo. Your protection is not up for discussion.

### Specifications:

- Crafted with a spring steel wire-formed head featuring an integrated strap guide.
- It weighs just 900g and presents a lightweight aluminium handle, ensuring effortless ease of use.
- It incorporates a sturdy twist-action mechanism, allowing secure locking at variable lengths.
- The 300mm head width ensures it works well with Silverback's pallet angles and equivalent industry products.
- Its telescopic design facilitates elevated reach while remaining compact for convenient storage solutions.
- Extends from 1.45m to 2.5m
- Designed in Australia
