

Dunnage Bags

Silverback's range of cargo protection products are designed to meet the ruggedness of the warehousing, transport and other general industries. Silverback's range of Dunnage Bags are a reliable and proven way of managing cargo movement in shipping containers and trucks giving peace of mind that your goods are protected while in transit, locally or around the world.

Silverback's dunnage bag are designed to reduce unwanted movement both laterally and lengthwise. Once inserted, they are inflated by compressed air, with the resultant expansion serving to 'wedge' the load against other cargo or the walls of the container. Dunnage bags are suitable for bracing loads in trucks, rail, or shipping containers and are ideal for bracing appliances, chemicals, plywood, paper, canned foods, particle board, fresh produce and machinery.

Dunnage bags are also the perfect bracing for any drummed, palletised, bottled, or packaged goods. The bags are labour saving, simple to install, easily deflated and removed, economical and reusable.

Silverback offers a range of dunnage bags from a paper version to a polypropylene. Both are heavy duty and laminated on the internal walls with a PE film. These bags have a heavy duty valve that can only be inflated with an air gun. There are 6 sizes to choose from so we will be sure to have one to suit your application.

Silverback can offer new and second hand pallet pads, hand wrap, machine wrap, PET, steel and woven lashing, packaging tape, pallet jacks, hand trolleys, container desiccant, spill equipment and everything else needed for your warehouse, storage and shipping needs, and are recognised leaders in this industry. For a full range of items and latest catalogues visit us at www.silverback.com.au.
