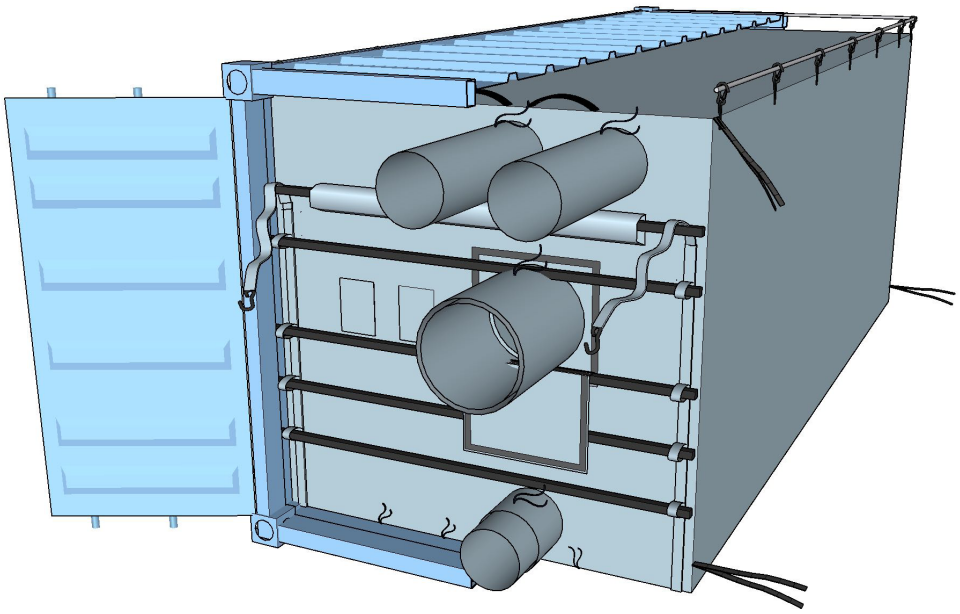
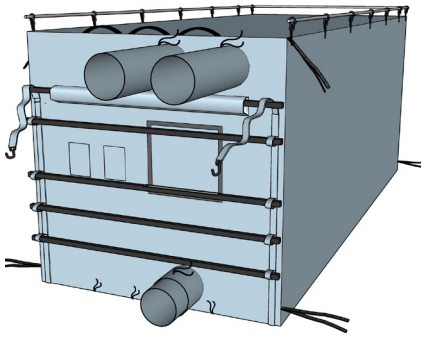
20ft PE Liner - TITAN

5800mm x 2360mm x 2400mm

SILVERBACK
SUPERIOR PROTECTION & SAFETY





Maximise efficiency with the Titan liner – built for easy loading and hassle-free reuse

The Titan liner boasts a range of features that enhance its versatility. It has two chutes on top: one for product loading and another to release air and dust during this process.

The large inspection chute lets an individual check inside and guide any product trapped in the corners towards the discharge chute. Once accomplished, the chute can be resealed with the provided ties and velcro panel.

The discharge chute features an external sleeve, enabling it to be fastened, facilitating liner reuse.

The five-bar bulkhead system securely holds the product and liner at the container doors.

Additionally, the top rope and clip system streamline the liner installation process.

MATERIAL

- Liner: 140 Micron PE

PACKAGING:

- Pallet (30 units) 600 liners per 20ft container
- Individual Weight: 13.5kg
- Pallet Weight: 415kg

COMPANION PRODUCTS:

- We also supply Steel Bulkhead Bars P/N:12100. Requirement is 5 bars/liner.
