- WPP outer & 85um inner liner.
- 4 x lift loops
- SWL: 2500kg
- Safety Factor 5:1
- Weight: 3.7kg each
- Pallet: 120 units

Concrete Washout bags can be collected and disposed of by any contracted waste collector/recyclers of your choice.

Our Solution: Silverback Concrete Washout Bags

- Dual-layer strength and protection with woven plastic.
- Holds up to 0.9m³ or 2500kg of waste.
- U-Panel design and construction: strong & reliable.
- Eco-friendly & legal-compliant.

Bags are batch tested and compliant with Australian Standard AS3668-1989. Strong construction with long ties to attach to Pumper.

Concrete Washout slurry is contained by the ultra-strong bag which is easily attached to the pump mechanism of the pump truck to capture waste slurry. The bag is detached when the cleaning is completed.
