AUSTRALIAN DANGEROUS GOODS LABELS:

ADGC sets out the technical requirements for the transporting of Dangerous Goods. Silverback stocks a wide range of class signs, hazardous labels and placards specifically for the labelling and identification of dangerous goods. Silverback Class 3.0 Flammabe Liquid labels comply with ADGC compliance and standards, helping your company follow the chain of responsibility.

Essential Labels for High-Energy Cargo.

Class 9A lithium battery miscellaneous dangerous goods contains high levels of electric energy. If packed incorrectly or damaged in transit, lithium batteries can short-circuit, causing them to overheat and catch fire.

Common devices containing rechargeable lithium ion batteries are laptops, mobile phones, MP3 players, portable DVD players, GPS/navigation systems, cameras, camcorders, scuba-diving lamps and power tools. As well as non-rechargeable metal lithium batteries that power watches, thermometers, remote car locks, back-up batteries in computers and communication equipment.

Class 9 Lithium Battery labels are designed to stick to Emergency Information Panels (EIP's), shipping containers, IBC's and hazardous gas substances stored or transported.

Please visit the Australian Dangerous Goods Code for more information in your States and Territories about Class 9 Miscellaneous Goods.
