ERK Driver Emergency Response Kit

SILVERBACK
SUPERIOR PROTECTION & SAFETY

SAFETY, ON-THE- GO

Order in bulk to receive exclusive discounts

Silverback 'Emergency Response Kits' (ERK) are purposely designed and kitted with appropriate PPE, first aid and safety equipment for drivers transporting Dangerous Goods (DG)placard loads.

Our ERK bag has reflective strips, a sturdy carry handle and a unique serial number. The PPE items are mostly 'Large' sizes to fit the majority of wearers. *ERK customization is an option.

Our standard ERK is suitable for most DG classes EXCEPT Class 6 and Class 8. We recommend always checking the ADGC guide for certainty and allow us to customise your kit to your specifications.
