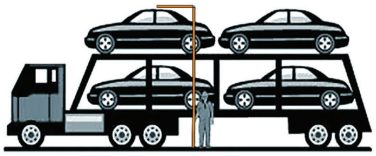
Load Height Measuring Pole

Telescopic 1.8m to 6m Metric ORANGE

SILVERBACK
SUPERIOR PROTECTION & SAFETY



Invest in Workplace Safety Equipment

Load Height Measuring Pole with range of 1.8m to 6m. Designed to keep your feet on the ground while taking important load height measurements for route planning, NHVR and CoR compliance.

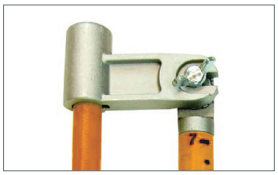
Metric & imperial measurements, swivel head, lightweight fibreglass construction for easy storage and handling.

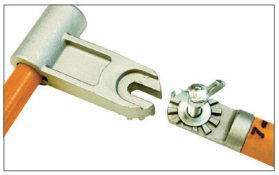
Supplied with handy carry bag.

Under the latest Heavy Vehicle National Law (HVNL) and Chain of Responsibility (CoR) rules, every party in the heavy vehicle supply chain is responsible and may be held liable for safety breaches committed anywhere along the chain. The Load Height Measuring Pole is a vital safety device in compliance with (HVNL) and (CoR), to ensure maximum load heights are not exceeded for intended travel routes. Ideal item for vehicle carriers, law enforcement, heavy haulers and oversize load transporters, also useful for anywhere height measurements up to 6m is required.

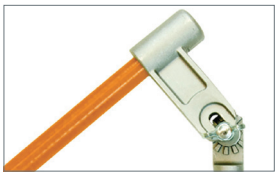
INSTRUCTIONS:

- Extend pole, lock into position with spring.
- The strong fibreglass construction and accurate easy-to-read metric numbers, make this an invaluable safety item.
- This basic height stick has a two piece hinge, a wing nut and metric measurement markings, allows for measuring from the centre of the truck/trailer not just the visible edge when the load height might be uneven.
- The forged metal hinge secures with an easy-to-use wing nut (included), and the body of the stick is made from strong, non-conductive fiberglass.
- Length is 1.37m when fully collapsed.

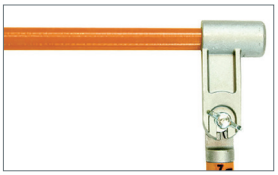




Loosen wing nut on the hinge.



Swivel the cross arm to the 90 degree position.



Tighten the nut, measure load.
