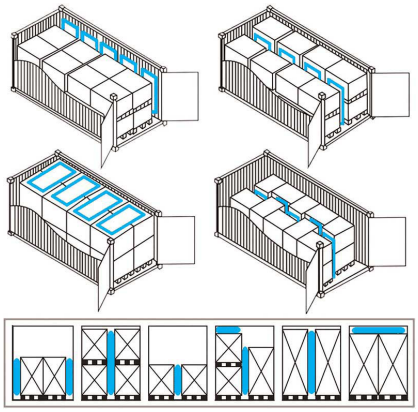
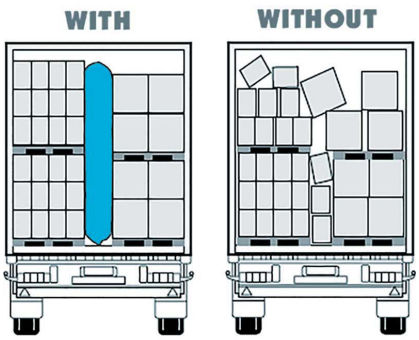
P/N: 11205 / 11206 / 11207

Woven Dunnage Bags

90 x 120cm, 90 x 180cm, 90 x 220cm

SILVERBACK
SUPERIOR PROTECTION & SAFETY





- 11205 - 90 x 120cm
- 11206 - 90 x 180cm
- 11207 - 90 x 220cm

Re-usable cargo protection

Dunnage bags are an ideal method for securing drummed, palletised, bottled, or packaged goods. The bags are labour saving, simple to install, easily deflated and removed, economical and reusable.

Silverback's superior woven polypropylene dunnage bags have a higher resistance to puncture, moisture and maintain their strength during an entire trip, with independent tests showing them to provide the most secure solution.

All bags are fitted with an optimal valve position ensuring easy access for inflation and deflation. The large size valve provides maximum airflow making our bags fast to inflate/ deflate, a great time saving feature.

Silverback's woven dunnage bags are designed to reduce cargo movement that can occur during road, rail and sea transport. Once inserted, they are inflated by compressed air, with the resultant expansion serving to 'wedge' the load against other cargo or the walls of the container or truck.

FEATURES:

- Made from heavy-duty woven polypropylene
- Water-resistant
- Reusable
- 100% recyclable
- Large volume self-sealing valve with cap
- Hold open seal function for hands-free deflation
- Printed inflation instructions with size and maximum space guide
- Bags and valves are batch tested before and after manufacturing
