WATER GATE

SILVERBACK

SUPERIOR PROTECTION & SAFETY

Silverback is a World Leader in solutions and environmental safety regarding water with its product WATER-GATE (modular and self-locking water dams) that contributes to the protection of communities from here and elsewhere (37 countries).

The Water-Gate Barrier is an innovative solution **to perform underflow dam operations in few minutes** to confine the floating polluant upstream and manage the release of the clean flow.

- ✓**Adapted for emergency response** on roads, in ditches, streams or any other location where it can be deployed;
- ✓Used to dam, dike, deviate, divert water flow: it's the perfect tool for pollution control.

No need to pump water or inflate air inside!

Water-Gate

OIL SPILL CONTAINMENT

EMERGENCY RESPONSE

Using the release hole flaps of the WT Series: perfect tool for pollution control.

✓Cleaning equipment such as sorbents, booms, skimmers or vacuum units can be used efficiently!

✓The lightness of the retention barrier (Ultra-strong PVC-coated polyester fabric) facilitates its handling in the deployment and it's resistant to many chemical substances.

✓A robust and durable (can be used for years) product that protects the environment.
